

TCW site users:

With today's technological advances, we are seeing an increased use in portable, handheld wireless devices that require apps to open Adobe .pdf files, so we did some "investigative footwork" and came up with the following information to assist you in viewing TCW resources and tools over your new tech gadgets.

Most Androids and iOS phones come with built in PDF readers. If you encounter problems opening a PDF document on your phone, try one of the following free Apps:

Android

Adobe Reader: https://play.google.com/store/apps/details?id=com.adobe.reader&feature=nav_result

Office Suite Viewer (PDF + Word Docs):

https://play.google.com/store/apps/details?id=com.mobisystems.office&feature=search_result

iOS

PDF Reader Lite: <https://itunes.apple.com/us/app/pdf-reader-lite/id368377690?mt=8>

Adobe Reader: <https://itunes.apple.com/us/app/adobe-reader/id469337564?mt=8>

To view Microsoft Office document on your phone, you most likely will be required to buy an app. Here are some good choices:

Android

OfficeSuite Viewer (Free!):

<https://play.google.com/store/apps/details?id=com.mobisystems.office&hl=en>

OfficeSuite Pro (\$15):

https://play.google.com/store/apps/details?id=com.mobisystems.editor.office_registered

Quickoffice Pro (\$15):

https://play.google.com/store/apps/details?id=com.qo.android.am3&feature=search_result#?t=W251bGwsMSwxLDEsImNvbS5xby5hbmRyb2lkLmFtMyJd

iOS

Quickoffice Pro HD (\$20): <https://itunes.apple.com/us/app/quickoffice-pro-hd-edit-office/id376212724?mt=8>

Polaris Office (\$13): <https://itunes.apple.com/us/app/polaris-office/id513188658?mt=8>

Smart Office (\$10): <https://itunes.apple.com/us/app/smart-office-2/id504520620?mt=8>

We hope this helps!
