

**CSU English/Math Courses Acceptable for UC Transfer Admission Requirements - Seven Course Pattern UC-E and UC-M**  
**Updated: December 2016**

The CSU courses listed below have been reviewed and determined acceptable for the UC Eligibility areas, UC-E and UC-M; in most cases, this acceptability determination was derived based on the course description in the catalog or by CSU AO recommendation based on the following criteria:

For CSU English = UC-E

1. The course must be baccalaureate level offered in either lower or upper division.
2. There must be a prerequisite or testing requirement comparable to the English Placement Writing Requirement.
3. The description of the course must include extensive writing and topics relating to composition
4. Course that strictly focus on writing (such as creative writing) without evidence of composition are *not* acceptable.
5. Courses that vary in topic or have a value of less than 4 quarterunits were *not* acceptable.

For CSU Math = UC-M

1. Courses above entry level math are not represented in this list because math is an area of sequential knowledge.
2. Courses with calculus in the title are presumed transferable and will not appear on this list.
3. Courses in math with acceptable prerequisites must also cover appropriate topics. The presence of an acceptable prerequisite is *not* enough to meet the UC-M requirement.

The courses listed *Under Review* have been identified as requiring more information in order to make a final decision.
